NovoPath, FrontRunnerHC to extend NovoPath 360 capabilities

Sept. 7, 2022—[NovoPath](#) has signed a resellers agreement with [FrontRunnerHC](#), a software provider that aims to help health care organizations maximize reimbursements with data automation solutions that provide accurate patient demographic, insurance, and financial information.

"NovoPath is a premier LIS provider and we're honored that they have chosen to integrate our data automation capabilities into their solution," John (JD) Donnelly, CEO of FrontRunnerHC, said in a press release. "The partnership reflects a shared understanding that by capturing accurate patient data and order entry information upfront, labs can maximize reimbursements while also helping to ensure that the patients' financial experience is as positive as their clinical one."

The agreement integrates NovoPath 360, an SaaS-based LIS platform, with FrontRunnerHC's LabXchange and PatientRemedi solutions to capture patient information at order entry, cross-check and fix errors in the patient data in real time, and automatically feed test orders to NovoPath 360 to be processed, tested, and diagnosed.
