

OGT expands sales support in Europe

October 2018—Oxford Gene Technology announced it is selling its Cytocell fluorescence in situ hybridization products through several affiliates of Sysmex Corp. in Europe. “The move is a testament to the ongoing successful integration of the two companies and commitment to combine efforts to support and serve end users,” according to a press release from OGT.

Cytocell FISH products are available in Poland, Czechia, Slovakia, France, Belgium, Switzerland, and Luxembourg.

The company is collaborating with Sysmex to develop an automated FISH testing system, combining OGT’s FISH reagent expertise with Sysmex’s instrumentation technology.
