

[OGT launches SureSeq Myeloid Fusion panel](#)

written by CAP TODAY

July 15, 2024

July 2024—OGT has launched the RNA-based SureSeq Myeloid Fusion panel, a next-generation sequencing tool for identifying key fusion genes implicated in acute myeloid leukemia. The panel identifies more than 30 key disease-associated fusions in AML, including KMT2A and MECOM fusions, in a single assay. It is fully compatible with OGT's Universal NGS Complete Workflow Solution and

complimentary data analysis software, Interpret.
