

Ortho Clinical, Leadman introduce assays in China

April 2019—Ortho Clinical Diagnostics, in collaboration with Beijing Leadman Biochemistry, launched four MicroTip partnership assays in China. The assays, for renal, liver, and cardiac testing, include cystatin C, α -hydroxybutyrate dehydrogenase, homocysteine, and total bile acid.

Leadman will offer these reagents in prefilled packages to be used on the Vitros 4600 chemistry system and the Vitros 5600 integrated system in China.
