Bio-Rad, NuProbe to develop digital PCR assays

written by CAP TODAY
December 16, 2022

December 2022—Bio-Rad Laboratories and NuProbe USA have entered into an agreement in which NuProbe will exclusively license its allele enrichment technologies to Bio-Rad for the development of multiplexed digital PCR assays. “Bio-Rad provides the leading solution for digital PCR, and we are committed to providing oncology researchers with technologies that enable everything from biomarker discovery to clinical trials and patient monitoring of minimal residual disease,” Simon May, EVP and president of Life Sciences at Bio-Rad, said in a joint press release. “We look forward to working with NuProbe USA to develop the next generation of highly multiplexed digital PCR assays as part of our expanding oncology offering.”

Roche gets EUA for high-throughput monkeypox test

written by CAP TODAY
December 16, 2022

December 2022—Roche announced that the FDA has granted emergency use authorization for the Cobas MPXV for use on Cobas 6800/8800 systems. The real-time PCR test is for the qualitative detection of DNA from monkeypox virus in lesion swabs collected from individuals suspected of having monkeypox infection by their health care provider. The assay uses β -globin as an endogenous control to assess specimen adequacy. It detects monkeypox nucleic acids and the endogenous control in the same well.

Bio-Rad introduces Unity Next Peer QC

written by CAP TODAY

December 16, 2022

December 2022—Bio-Rad Laboratories has launched Unity Next Peer QC, a quality control peer comparison software that provides access to peer reporting and comprehensive quality control data.

[Verichem reference materials for lactate assays](#)

written by CAP TODAY
December 16, 2022

December 2022—Verichem Laboratories announced the availability of a six-level, protein-based kit designed for the calibration or calibration verification of lactate assays on automated clinical systems. The liquid-stable, ready-to-use product contains concentration levels of lactate ranging from 3.2 mg/dL to 160 mg/dL. The format is free of glycols, surfactants, azides, and other interfering substances. Shelf life is 18 months from the manufacturing date.
