## [Seegene unveils CURECA-100% unattended PCR automation](#)

written by CAP TODAY  
August 5, 2025

Seegene introduced CURECA, a fully automated PCR solution that processes diverse specimen types (urine, blood, sputum, and stool) and performs the entire PCR workflow from sample loading to result. CURECA performs the entire PCR testing process without any human intervention, enabling nonstop operation, 24 hours a day, seven days a week. CURECA automatically stops and refills consumables and transfers testing plates to the next step. CURECA configuration can be tailored to specific laboratories that demand particular test types and have space constraints. CURECA offers flexibility in diagnostics, from small-scale to large-scale testing, enabling broad coverage of diseases.
