Rapid Zika virus diagnostic, 6/16

written by CAP TODAY
June 15, 2016

June 2016—Rheonix, in collaboration with New York University College of Dentistry, has received funding from a Small Business Innovation Research Phase I/II Fast-track grant from the National Institute of Dental and Craniofacial Research of the National Institutes of Health to develop a rapid diagnostic for Zika virus infection.

FISH probes for glial tumors, 6/16

written by CAP TODAY
June 15, 2016

June 2016—Oxford Gene Technology launched its CE-IVD labeled Cytocell Aquarius 1p36/1q25 and 19q13/19p13 Deletion Probe Kit, a fluorescence in situ hybridization kit for the reliable investigation of glial tumors.

NGS assays for hematological malignancy profiling, 6/16

written by CAP TODAY
June 15, 2016

June 2016—ArcherDX announced three targeted next-generation sequencing assays to capture and identify known and novel gene fusions, point mutations, and relative expression levels in myeloid and lymphoid origin malignancies. The Archer FusionPlex Blood Cancer panels use Archer's proprietary Anchored Multiplex PCR to detect known and novel fusions from RNA.

Cell-based imaging software, 6/16

written by CAP TODAY
June 15, 2016

June 2016—BioTek launched the Gen5 3.0 data analysis software for its imaging and microplate detection instruments.

Binding Site, Rockland enter distribution agreement, 6/16

written by CAP TODAY
June 15, 2016

June 2016—The Binding Site Group has entered into an exclusive, definitive agreement with Rockland Immunochemicals to grant Rockland global distribution rights for Binding Site's line of animal-focused radial immunodiffusion test kits. The RID immunoassay kits incorporate monospecific antibodies in an agarose gel to provide accurate quantitation.

Mopec, Milestone sign agreement, 6/16

written by CAP TODAY

June 15, 2016

June 2016—Mopec has signed an exclusive agreement to feature Milestone's MacroPath pro-x macro digital imaging system with its MB800 grossing station.
