# [Quantimetrix Dipper POCT now with integrated barcode](#)

written by CAP TODAY  
May 17, 2024

May 2024—Quantimetrix announced that its Dipper POCT urinalysis dipstick control pouches now include a barcode. The integrated barcode is designed to streamline the workflow and reduce errors that can arise from manually entering lot numbers and expiration dates. Dipper POCT kits contain ready-to-use, single-use plastic pouches in two levels, each filled with 1.5 mL of liquid control material. The product is stable for three months at room temperature and up to three years at 2° to 8°C.

## **Verichem updates data reduction software**

written by CAP TODAY  
May 17, 2024

May 2024—Verichem Laboratories has upgraded its Web-based, CLIA-compliant data reduction and test reporting software. The new version allows customers to save reports on the company's server for future editing and edit previous submissions for up to three days after the initial submission. Previous submissions are autosaved so users can edit data without rekeying or reentering any other component information. The software is available to customers at no cost.
