

Pipettes, 10/16

At the AACC show 2016

October 2016—BrandTech Scientific featured its line of Brand liquid handling products, including the Transferpette S single and multichannel pipettes optimized for handling sensitive clinical samples. The pipettes are designed for ergonomic, one-handed volume adjustment, are completely user serviceable and fully autoclavable, and are CE-IVD compliant. The Transferpette electronic pipettes, with individually adjustable finger rests, are independently certified “Ergonomics approved” by TÜV Rheinland, a nationally recognized testing laboratory. All Brand liquid handling products are designed for in-lab calibration for ISO/GLP compliance.
