

## Processor/stainer for frozen sections, 6/16

**June 2016—Presto from Milestone Medical is a fully automated benchtop processor/stainer** for high-quality frozen sections. A rapid standardized approach to processing the specimen slide (fixation, dehydration, and clearing) followed by automated staining protocols aims to eliminate user-to-user variability and provides results in as few as four minutes. The Presto enables stain choice through an open platform approach and offers fully programmable protocols.
