

Qiagen partners with Health Innovation Manchester

September 2018—Qiagen announced a partnership with multiple organizations to support creating a worldwide genomics campus in Manchester, U.K., for innovation, life sciences, translational science, and molecular diagnostics. Qiagen is working with Health Innovation Manchester to bring together public, academic, and clinical resources to develop the Genomic Health Innovation Campus, anchored by Qiagen's European Centre of Excellence for Precision Medicine and hub for diagnostics development. The campus will be built on the Manchester University NHS Foundation Trust's clinical site in the Corridor Manchester innovation district.
