

[Quest adds p-tau217 to test menu](#)

written by CAP TODAY

August 14, 2024

August 2024—Quest Diagnostics launched a blood biomarker test for phosphorylated tau 217, a biomarker associated with Alzheimer’s disease. It is the latest addition to Quest’s AD-Detect portfolio of tests, which also includes tests for p-tau181, amyloid beta proteins, and apolipoprotein E isoforms.
