

## Safety-Spec launches gross room trays

July 2023—Safety-Spec launched its Safety-Spec Gross Room Tray. The reusable trays are designed to ensure tissue specimens are easily accessible, properly labeled, and neatly organized. Each tray is constructed of high-quality, dense, closed-cell foam, providing a lightweight, flexible, nonbreakable, and washable tray that can accommodate up to four specimen bottles, eight cassettes (two per specimen), and specimen-related paperwork. Trays are available in packs of 30, 60, 90, and 120, with red, yellow, green, blue, purple, and white trays in each pack.
