

SciGene FISH hybridizer

June 2018—SciGene introduced the CytoBrite Plus Slide Incubation System, a programmable FISH hybridizer with onboard temperature verification of each slide position, as required by CAP cytogenetics checklist item CYG.33950. Individual sensors continuously monitor each of the 12 slide positions. A NIST-certified digital thermometer verifies the temperature of each slide. Time and temperature are recorded to a USB drive. The instrument can be used alone or as part of the MicroFISH Assay System.
