

## Semrock master catalog, 10/14

October 2014—In its 20th catalog edition, Semrock introduces seven groundbreaking LED light engine filter sets. The sets are optimized for compatibility with the most popular LED-based light engines on the market. The company has also expanded the EdgeBasic family with the introduction of three short-wave-pass filters designed to transmit from 350 nm in the UV, deliver OD 6 blocking of the laser line, and offer extended blocking up to 1200 nm into the infrared.

Highlighted products in the 2014–2015 catalog include DAPI, FITC, TRITC, and Cy5 LED filter sets available in single-band, full, and Pinkel multiband versions; DAPI, FITC, and Texas Red Pinkel multiband LED filter set; Cy5 Basic filter set; assorted single-band bandpass, edge filters, and dichroics; 442/488/561 Yokogawa CSU-X1 dichroic; and RazorEdge dichroic now offered at 355 nm and 457.9 nm.
