

Siemens, Fast-track Diagnostics deal, 10/17

October 2017—Siemens Healthineers announced a strategic relationship with Fast-track Diagnostics that includes the addition of FTD's broad range of CE-marked kits and multisyndromic panels to the menu of Siemens' Versant kPCR Molecular System. The addition of FTD's menu of kits and panels covers conditions from respiratory to gastroenteritis to central nervous system and childhood infections. The Versant kPCR Molecular System now features more than 75 assays, consolidating testing for the infectious disease spectrum in a single molecular ecosystem.
