

## Siemens, Relaymed deal, 7/17

**July 2017**—Siemens Healthineers announced a strategic alliance with Relaymed to bring customers secure, cloud-based connectivity for Siemens DCA Vantage analyzer and Clinitek Status point-of-care instruments. With Relaymed integration, patient test results are automatically and instantly sent from the POC instruments to physician-office electronic health record systems; eliminating manual input reduces the potential for errors and revenue loss. Relaymed automatically captures all quality control samples run and provides data analytics for CLIA compliance.
