

Sysmex America launches XF-1600 automated flow cytometer

June 26, 2020—[Sysmex America](#) announced the availability of its XF-1600 automated flow cytometer. The XF-1600 works in tandem with Sysmex's PS-10 Sample Preparation System to automate the entire process of antibody staining, incubation, and flow cytometry analysis. "Highly trained operators no longer have to spend hours manually pipetting, leaving valuable time for more complex activities," Andy Hay, chief operating officer of Sysmex America, said in a statement. It is available now in the United States and Canada.
