

Sysmex TH-11 urinalysis decapper unit

December 2021—Sysmex introduced its TH-11 Urine Sample Decapper Unit, which is designed to be used in conjunction with the Sysmex UN-Series Automated Urinalysis Solution. The unit is intended to eliminate manual decapping work, which can reduce workplace repetitive injuries, streamline work processes, and reduce exposure to biological hazards. The TH-11 comes in desktop or wagon modules.
