

Tests for *M. genitalium*, 10/16

At the AACCC show 2016

October 2016—SpeedX Pty, Ltd., featured its PlexPCR for the detection of infectious disease pathogens and the ResistancePlus multiplex qPCR test for the detection of *Mycoplasma genitalium* and antimicrobial resistance markers. ResistancePlus MG is a qPCR test that combines *M. genitalium* identification and information on macrolide antibiotic resistance. The *M. genitalium* ResistancePlus Kit is for research use only and is not for sale in the U.S.
