

Tissue-embedding center workstation, 5/13

Tanner Scientific's TN1500 tissue-embedding center is a user-friendly workstation that was designed with the input of hundreds of histology lab supervisors.

The workstation features a four-line digital display for easy programming (all surface temperatures can be viewed and adjusted without the need to scroll), a fully adjustable cryoplate that can be placed on the right or left side, an adjustable-intensity bright LED light on a flexible tube, a 2.6-gallon tank capacity, an extra-large magnifying glass on a flexible tube, and more.
