

Urine specimen stabilizer, 5/14

May 2014—The Vacuette Urine CCM Tube from Greiner Bio-One is an evacuated tube, which contains a stabilizer powder that keeps the urine sample stable up to 48 hours at 20°-25°C. During this time, the urine specimen can be stored or transported without refrigeration. The tube can be used for urine screening (strip test, sediment, clinical chemistry) and for microbiology.
