

Validate kits for Roche, Beckman

August 2019—LGC Maine Standards released its Validate SP3 linearity and calibration verification kit for Roche Cobas and Beckman Coulter Immage analyzers. The kit, in a human serum matrix, evaluates α 1-acid glycoprotein, antistreptolysin O, B2-microglobulin, and immunoglobulin E.

The company also released its Validate High Sensitive Troponin linearity and calibration verification kit, in a human serum matrix, for Beckman Coulter Dxl/Access.
