

Verichem reference materials for protein assays

October 2022—Verichem Laboratories offers liquid-stable, ready-to-use clinical reference materials for protein testing. The multilevel and combined Total Protein/Albumin Standard Kit, along with the optional and standalone level F, and the Microprotein Standard Kit are designed and manufactured for the calibration and calibration verification of albumin and total protein assays on a range of clinical testing systems, including from Abbott Diagnostics, Beckman Coulter, Roche Diagnostics, and Siemens Healthineers.

The materials are prepared with human serum albumin and gamma-globulin serum proteins in a saline-based solution and have a shelf life of 24 months from the manufacturing date. Each vial contains 15 mL of material at each concentration level.
