

## Wipes minimize cross-contamination, 10/13

Current Technologies' Bio-Hazard wipes protect patients and employees from cross-contamination when opening and handling specimen containers and sputum cups. The white side of the Bio-Hazard wipe absorbs specimen contents and sputum, while the orange plastic backing prevents splash or leakage from containers to gloves.

Useful wherever specimens are collected or handled, the wipes are available in 3 × 3-in. and 4 × 4-in. sizes and come in three absorbencies—standard, heavy, and super sponge-plus. Acrylic holders are available for convenient storage.
