Oct. 13, 2022—[ZeptoMetrix](#) has released its NATtrol external run control for flu A and B, RSV B, and SARS-CoV-2, for research use only. The third-party molecular quality control can be used by laboratories to monitor the continued performance of their multiplexed respiratory assays and is formulated with purified, intact organisms. Each control pack contains six 0.5 mL of NATtrol inactivated virus and is stable at 2° to 8°C.
